ProTouch *HD*

Heavy Duty Nitrile Protective Gloves

Description: **ProTouch HD** gloves are reusable, sterilizable and chemical resistant utility gloves made of durable nitrile rubber.

Intended Use: **ProTouch HD** provide excellent protection to the healthcare professional from bloodborne pathogens and chemicals during disinfection and decontamination procedures.

Product Specifications:

Material:	Chemical resistant nitrile rubber.
Color:	Aqua green.
Lining:	Flocked.
Finish:	Textured.
Thickness:	15 mil.
Sizes:	Small, medium, large.
Packaging	1 pair per pack, 6 packs per case.
Reorder Numbers:	PGPS94 - Small PGPM96 - Medium PGPL98 - Large

Product Capabilities: **ProTouch HD** heavy duty nitrile protective gloves are manufactured to resist cuts, snags, abrasions and punctures. They are long lasting reusable utility gloves which are more durable and provide greater protection than latex utility gloves.

ProTouch HD gloves are autoclavable in a chemical vapor or steam sterilizer.

The flock lining allows for effortless hand insertion and removal.

The textured finish on palm and fingers provides a non-slip grip, wet or dry, for easier handling of instruments.
