

ProView *plus*

Self Sealing Sterilization Pouches

Description: **ProView *plus*** sterilization pouches are convenient self-sealing sterilization packages constructed with medical grade paper on one side and transparent film on the other.

Intended Use: **ProView *plus*** sterilization pouches are designed to securely enclose instruments during sterilization processing and to maintain sterility during storage. Compatible with steam, chemical vapor, or EtO sterilization processes.

Product Specifications:

Paper Material:	Medical grade paper, non-recycled.
Film Material:	5-ply film of coax polypropylene.
Film Color:	Blue.
Adhesive Strip:	3/4 inch, with dry edges on release liner for easy removal.
Indicator Arrows:	Steam/chemical vapor indicator and EtO indicator.
Reorder Numbers:	
PM2440	2 1/4" x 4" box of 200
PM3590	3 1/2" x 9" box of 200
PM5015	5" x 15" box of 200
PM5410	5 1/4" x 10" box of 200
PM7513	7 1/2" x 13 1/2" box of 200

Product Capabilities: **ProView *plus*** sterilization pouches are made with the highest quality material including 36#, high wet strength kraft medical grade paper, five-ply coax polypropylene laminate and three quarters inch of self sealing tape.

The thumb notch at the chevron end and generous knuckle roll area facilitate easy opening and aseptic transfer.

The strong, solid rail design protects against instrument breakthrough.

ProView *plus* sterilization pouches are designed to maintain sterility during opening. The rails extend to the edge to avoid trapping dust. The tack tops prevent curling of the plastic and the collection of dust near the chevron. The chevron at the presentation end assures a smooth, lint-free opening of the package.

Unique quick release tape feature provides easy removal of release liner.

The self-sealing adhesive strip eliminates the need for tape or heat sealers. The perforation in the adhesive strip provides a triple seal of tape to tape, tape to paper and tape to film.

Pouches may be used up to 290°F. Indicator on the pouch will turn dark to provide visual assurance that contents have been processed.

Use Precautions: **ProView *plus*** sterilization pouches are designed for single use only. Not recommended for use in the J & J Sterrad or other hydrogen peroxide processes.

ProView[®] *plus*

Self Sealing Sterilization Pouches

Triple Seal

- Perforation on adhesive strip provides a stronger seal of adhesive to paper, adhesive to film and adhesive to adhesive.

User Friendly

- Featuring a thumb notch and generous knuckle roll area allowing easy opening and aseptic transfer.
- "Quick-release" tape enables effortless removal of the release liner with a gloved hand.

Consistent Performance

- Constructed from the highest quality materials to ensure a consistently clean peel.

Versatile

- Recommended for use in steam, chemical vapor and gas sterilization processes.

Packaging That Protects

ProView plus sterilization packaging contains the highest quality materials, is manufactured to a dependable standard and offers a wide variety of packaging choices. **ProView plus** sterilization pouches are available in eleven sizes.
