

### Wrapping your cassette.

- \* Open your cassette at chairside and use the wrap as a sterile area.
- \* Slim, not as bulky as pouches.
- \* No need to wrap individual instruments, wrap or pouch the entire cassette.

### Pouching your cassette.

- \* Sliding your cassette into the pouch is quick and simple.
- \* Faster cycle in your autoclave than with wrapped cassettes.
- \* Clear top layer allows for quick identification of the cassette.
- \* No sterilization tape needed.
